Education

PES University

B.Tech, Computer Science (AI & Machine Learning)

Bangalore, India

Aug 2023 – May 2027

Coursework: Data Structures and its Applications, Design and Analysis of Algorithms, Operating Systems, Computer Networks, Database Management System, Compiler Design, Cloud Computing

Work Experience

Wadhvani Foundation [Website](#)

Bangalore, India

AI Intern

Jun 2026 – Aug 2026

- Worked on Content Ingestion for the backend RAG system of **Wadhvani Liftoff.ai**, an enterprise AI platform, studying document processing, embeddings, vector search, and asynchronous services.
- Explored the Python/FastAPI repository and traced Controller–Service–Repository workflows for document and Excel ingestion, studying dependency injection and service boundaries.
- Reviewed retrieval and ingestion design across Qdrant, RabbitMQ, MongoDB/CosmosDB, and Azure Blob Storage, including tenant-aware processing and recovery workflows.

Superhero Learning [Website](#)

Bangalore, India

Web Developer Intern

Jun 2025 – Sep 2025

- Owned **4 of 5 application routes (80%)** and built **5 core UI modules** for an online education platform using **Next.js, React, and Tailwind CSS**.
- Developed responsive, interactive components including a Swiper.js hero carousel, stateful FAQ, data-driven course cards, and metrics dashboard; delivered features through **8 merged PRs**.

Skills

Languages: Python, Java, SQL, TypeScript, JavaScript

Backend & APIs: FastAPI, Node.js, Express, REST, gRPC, JWT, RBAC, Rate Limiting

Distributed Systems: Kafka, Event-Driven Architecture, Microservices, Asynchronous Processing, Fault Tolerance

Cloud & DevOps: Docker, Kubernetes, GitHub Actions, CI/CD, AWS

Databases: PostgreSQL, MongoDB, Redis, SQLite

CS & Engineering: Data Structures & Algorithms, Operating Systems, Computer Networks, Software Engineering

Frontend: React, Next.js, Tailwind CSS, Swiper.js

Projects

Mandate – AI-Agent Financial Control Plane [GitHub](#) — [Live Demo](#)

FastAPI, PostgreSQL, Redis, MCP, Docker

- Built a financial authorization control plane that lets AI agents execute Razorpay operations within explicit spending, delegation, and human-review limits.
- Implemented deterministic policy evaluation, hierarchical mandate delegation, dynamic MCP tool filtering, atomic PostgreSQL budget reservations, and zero-gateway-dispatch enforcement.
- Verified **100/200/500**-concurrent PostgreSQL reservation workloads across 12 trials with zero overspend; blocked **1,144/1,144** simulated adversarial authorization scenarios with zero unauthorized gateway effects.
- Implemented webhook replay protection, financial state-transition safeguards, cascading mandate revocation, failure recovery, reconciliation, rate limiting, and observability.

UnderdogAI – High-Throughput Event-Driven Decision Platform [GitHub](#)

Kafka, gRPC, PostgreSQL, Kubernetes

- Built a decision-intelligence platform that predicts football upset probabilities and runs large-scale tournament simulations through distributed backend services.
- Increased HTTP API throughput **57%**, from 352 to 553 req/s, at 50 concurrent clients across 1,000 requests; reduced P50/P95/P99 latency by **37%/26%/29%** with zero failures.
- Reduced server CPU time **42%** and peak memory usage **10%** through bounded TTL caching, asynchronous processing, shared service clients, and optimized request paths.
- Built fault-tolerant Kafka processing with manual offset commits, idempotent job handling, atomic Redis completion, bounded retries, and exponential backoff; recovered from two injected failures in **3.0 seconds**.

Adaptive Golf Alliance Foundation – Client Website [Live Website](#)

React, TypeScript, TailwindCSS, Vercel

- Built and deployed a production website for an external adaptive-golf organization, providing responsive navigation, accessible content, and user-facing contact workflows.
- Developed the React/TypeScript frontend with Tailwind CSS and deployed it on Vercel, optimizing loading and asset delivery for a media gallery serving **30+** assets.

Achievements

3× DAC Scholarship Recipient, PES University; **350+ LeetCode problems solved**; **Top 10, Kodikon National-Level Hackathon** among **280+ teams**; **Technical Team Member, The Alcoding Club**.
