Summary

Computer Science (Artificial Intelligence and Machine Learning) Undergraduate focused on Python, FastAPI, event-driven architecture, and distributed systems. Built and benchmarked a FastAPI/Kafka platform that improved throughput 57% to 553 req/s, reduced server CPU time 42%, and processed 63,000+ simulations per task. Experienced with Kubernetes, Docker, PostgreSQL, Redis, and asynchronous processing.

Skills

Languages: Python, Java, SQL, TypeScript, JavaScript

Backend & APIs: FastAPI, Node.js, Express, REST, gRPC, JWT, RBAC, Rate Limiting

Distributed Systems: Kafka, Event-Driven Architecture, Microservices, Asynchronous Processing, Fault Tolerance

Cloud & DevOps: Docker, Kubernetes, GitHub Actions, CI/CD, AWS

Databases: PostgreSQL, MongoDB, Redis, SQLite

Frontend & AI: React, Next.js, Tailwind CSS, RAG, FAISS, Embeddings, Vercel

Work Experience

Wadhvani Foundation

Bangalore, India

AI Intern

Jun 2026 – Aug 2026

- Participated in architecture reviews for an enterprise-grade, multi-tenant content platform spanning API gateway, document-processing, conversational RAG, vector-search, and asynchronous messaging services.
- Reviewed the Python/FastAPI repository and traced Controller-Service-Repository workflows for structured Excel ingestion, studying dependency injection and service boundaries across the document-processing stack.
- Studied the distributed service architecture connecting FastAPI, NestJS, RabbitMQ, MongoDB/CosmosDB, Qdrant, and Azure Blob Storage across asynchronous document and Excel-ingestion workflows.

Superhero Learning

Bangalore, India

Web Developer Intern

Jun 2025 – Sep 2025

- Developed and deployed 8+ MERN pages serving 100+ active users; optimized MongoDB indexing and query execution, reducing API response latency by 25%.
- Improved page-load speed by 10% through asset compression and request-level performance optimizations while maintaining cross-browser compatibility.

Projects

UnderdogAI – High-Throughput Event-Driven Decision Platform *FastAPI, Kafka, gRPC, Redis, PostgreSQL, Kubernetes, Docker*

- Improved HTTP API throughput 57%, from 352 to 553 req/s, in a benchmark with 50 concurrent clients and 1,000 requests; reduced P50, P95, and P99 latency by 37%, 26%, and 29%, respectively, with zero failures.
- Reduced server CPU time 42% and peak memory usage 10% through bounded TTL caching, asynchronous processing, shared service clients, and optimized request paths.
- Designed fault-tolerant Kafka processing with manual offset commits, idempotent job handling, atomic Redis completion, bounded retries, and exponential backoff; recovered from two injected failures in 3.0 seconds without premature offset commits.
- Engineered asynchronous Monte Carlo workers processing 63,000+ match simulations per task and deployed containerized services with CI/CD validation, health probes, metrics, and rolling Kubernetes deployments.

SentinelGraph – Behavioral Intelligence Platform

Python, FastAPI, NetworkX, Docker, PyTorch, Redis

- Built an 11-step event-processing pipeline combining graph analysis and risk-fusion services to score 10K+ logs at 3.4 ms average latency.
- Reduced threat-triage time 65% by delivering dynamic graph-topology visualization and real-time event-timeline tooling
- Containerized backend services with Docker Compose and created a 56-test Pytest suite that achieved a 100% automated pipeline pass rate.

Adaptive Golf Alliance Foundation

React, TypeScript, TailwindCSS, Vercel

- Delivered a production React application for an external client with responsive navigation, accessible UI components, and validated contact workflows.
- Improved frontend performance through lazy loading, asset optimization, and code splitting for a media gallery serving 30+ assets; deployed the application on Vercel.

Education

PES University

Bangalore, India

B.Tech, Computer Science (AI & Machine Learning)

Aug 2023 – May 2027

CGPA: 7.85/10.00

Coursework: Web Technologies, Compiler Design, Cloud Computing, Software Engineering, Operating Systems, Computer Networks, Data Structures & Algorithms
